

jEdit

Overview

- Some key concepts: <http://www.jedit.org/users-guide/overview.html>

Running

1. Download and extract <link>
2. It is already an IntelliJ project, use Open project
3. Go to File > Project Structure and Set JDK
4. Run configurations, Jar Application, build/jedit.jar like you did for ArgoUML
5. Main class: org.gjt.sp.jedit.jEdit
